

# Classi-Seal: The Revolutionary Waterproofing System from Classic Marble

Leading bathroom manufacturer Classic Marble introduces the latest advancement in bath and shower installation, the multi award winning Classi-Seal.

Classi-Seal is a revolutionary waterproof upstand that completely eliminates the potential for water leakage, and subsequent costly repairs caused by shrinkage and settlement. The flexible, self-adhesive Classi-Seal strip offers a perfectly watertight seal around any area where waterproofing is essential, be it the bath, shower or kitchen worktop. To ensure a perfect seal, the contact surface should be clean and dry. Classi Seal should be removed from the backing paper 100mm at a time for easy control of the adhesive. Lining the black bonding agent up with the outside edge of the bath or shower tray the flexible Classi-Seal strip is then pressed along every side facing an adjoining wall, until all sides that are to be tiled are sealed. The Classi Seal provides immediate waterproofing and is specifically designed to accommodate vertical movement of least 15mm between appliance and contact wall. Classi Seal requires no cure time so can be tiled over immediately. Classi-Seal contains patented technology which guarantees the effectiveness of the seal in corners. The blue upstand is easily manipulated by hand to accommodate corners which are not perfectly square, so as not to interfere with the laying of

tiles. The flexibility of the upstand also allows the strip to be fitted against walls of uneven finish with ease. Fitting Classi-Seal takes just minutes and is guaranteed for the duration of the bathroom's lifespan, making it a straightforward, cost effective and incredibly innovative solution to the age old problem of water leakage.
